INTEREST OF THE *AMICI*[1]

The organizations and individuals submitting this brief work with and on behalf of adolescents in a variety of settings. Some provide direct representation to minors who become involved in the juvenile justice and child welfare systems. Some work to create laws and policies that promote the fair treatment and well-being of youth in these systems. Others are psychologists, psychiatrists, and law professors with expertise in adolescent development and its relevance to the law. They join in this brief to assert that law enforcement officials must take into account age and lack of experience with the justice system in assessing whether a reasonable youth would believe he was in custody during police interrogation.

IDENTITY OF THE *AMICI*[2]

Juvenile Law Center; Children and Family Justice Center; Juvenile Justice Project of Louisiana; Legal Services for Children; Mexican American Legal Defense and Educational Fund; National Council of La Raza; Public Defender Service for

protections or more limited rights based upon minors' distinct developmental characteristics. Lastly, a myriad of state statutes and case law treat minors differently across a number of domains, mirroring the legal boundaries between adults and children so solidly established by this Court.

Scholarly research in the field of adolescent development confirms the developmental and social differences upon which

ARGUMENT

I. UNITED STATES SUPREME COURT JURISPRUDENCE, AS WELL AS STATE STATUTES AND CASE LAW, CONSISTENTLY TAKE ACCOUNT OF THE DEVELOPMENTAL DIFFERENCES BETWEEN MINORS AND ADULTS IN DETERMINING MINORS' CONSTITUTIONAL AND LEGAL RIGHTS

A. This Court Has Historically Viewed Minors' Constitutional Rights Through a Discrete Lens, Extending Greater Protections or Fewer Rights To Minors Based Upon Their Distinctive Developmental and Social Characteristics

That minors are "different" is a principle that permeates

voluntary, in the sense that it was not coerced or suggested, but also that it was not the product of ignorance of rights or of adolescent fantasy, fright or despair."

More recently, in this Court's *per curiam* decision in *Kaupp v. Texas*, 538 U.S. 626, 123 S.Ct. 1843 (2003), where it held a 17-year-old's confession must be suppressed following an illegal arrest (absent undisclosed intervening evidence in the record) under the Fourth and Fourteenth Amendments, this Court applied earlier precedents in considering the defendant's status as a 17-year-old in its analysis:

> A *17-year-old boy* was awakened in his bedroom at three in the morning by at least three police officers, one of whom stated "we need to go and talk." .... [The boy's] 'Okay' in response to Pinkins's statement is no showing of consent under the circumstances. *Pinkins offered [the boy] no choice, and a group of police officers rousing an adolescent out of bed in the middle of the night with the words 'we need to go and talk' presents no option but 'to go.'* There is no reason to think [the boy's] answer was anything more than 'a mere submission to a claim of lawful authority.'

538 U.S. at ____, 123 S. Ct. At 1846-47 (emphasis added)(citations omitted).

The Court's holdings in the above-cited cases that minors, in comparison with adults, are generally less mature, more submissive in the face of police authority, and lack critical knowledge and experience, presage the Ninth Circuit's conclusion that a reasonable juvenile in the circumstances in which Michael found himself might *not* have believed that he was free to leave the police station. The Court's findings also confirm that these developmental and situational differences, which are well documented in academic research, *see Part II*

infra, are objectively knowable facts about adolescence and, therefore, appropriately considered when determining whether a youth was 'in custody' during interrogation.

This Court's more protective stance toward youth in confession cases parallels its distinctive view of children and adolescents in other settings. In the school environment, for example, this Court has repeatedly accorded youth a more restricted liberty interest in their persons and possessions under the Fourth Amendment. The Court has upheld the constitutionality of warrantless searches by school officials of students' belongings upon reasonable suspicion that a student has violated school rules or the law, *New Jersey v.T.L.O.*, 469 U.S. 325, 341-42 (1985); upheld random, suspicionless drug testing of student athletes, *Vernonia Sch. Dist. v. Acton*, 515 U.S. 646, 654 (1995); and upheld random, suspicionless drug testing of students engaged in extracurricular activities, *Board of Ed. of Ind. Sch. Dist. No. 92 of Pottawatomie Cnty. v. Earls*, 536 U.S. 822, 838 (2002).

In support of these rulings, the Court has noted, "[t]raditionally at common law, and still today, *unemancipated minors lack some of the most fundamental rights of self-determination* – including even the right of liberty in its narrow sense, *i.e., the right to come and go at will. They are subject, even as to their physical freedom, to the control of their parents or guardians*." *Vernonia*, 515 U.S. at 654 (emphasis added) (citation omitted). This echoes the Court's earlier declaration in *Schall v. Martin*, 467 U.S. 253, 265 (1984), in explaining the

Baird, 443 U.S. 622, 635 (1979) (emphasis added), as well as "the ability to make fully informed choices that take account of both immediate and long-range consequences." *Id.* at 640; *see also Hodgson v. Minnesota*, 497 U.S. 417, 444 (1990) ("The State has a strong and legitimate interest in the welfare of its young citizens, whose *immaturity, inexperience, and lack of*

Similarly, in *Parham v. J.R.*, 442 U.S. 584 (1979), this Court rejected a constitutional challenge to Georgia's civil commitment scheme that authorized parents and other third parties to involuntarily commit children under the age of eighteen. In curtailing children's liberty interests in this context, the Court noted that "[m]ost children, even in adolescence,

the detective's authority. Once Michael was separated from his parents, the detective never told Michael that he was free to leave or that he could speak to his parents at any time if he so desired. It was thus objectively knowable to the officer that a reasonable minor in Michael's position would have believed that, at that point in time, he was no longer in his parents' physical custody but rather in the detective's custody. *See also J.J.C.*, 689 N.E. 2d 1172, 1180 (Ill. App. Ct. 1998) ("when a juvenile's parents are present [at the police station] request to

L. REV. 1, 16 (1951); *Ackerman v. Advance Petroleum Transport*, 7. N.W. 2d 235, 239 (Mich. 1942); *Frazier v. Northern Pac. Ry.*, 28 F. Supp. 20, 24 (Idaho 1939); *Alabama Power Co. v. Taylor*, 306 So. 2d 236, 250 (Ala. 1975); *Beekman Estate v. Midonick*, 252 N.Y.S.2d 885, 887 (N.Y. 1964); *Clark v. Circus-Circus, Inc.*, 525 F.2d 1328, 1331 (9th Cir. 1975); *DeLuca v. Bowden*, 329 N.E. 2d 109, 111 (Ohio 1975).

Accordingly, when teenagers are involved in dangerous activities courts have been careful to use the youth's age as a determining factor in assessing the reasonableness of their conduct. *See, e.g., Purtle v. Shelton*, 474 S.W.2d 123, 125 (Ark. 1971) (conduct of seventeen-year-old involved in gun accident assessed through a "reasonable child" standard); *Newman v. Crawford Construction Co.*, 799 S.W.2d 531, 532 (Ark. 1990) (holding fourteen-year-old to a child standard of care when conduct led to an injury on a construction site); *Goss v. Allen*, 360 A.2d 388, 391 (N.J. 1976) (providing that seventeen-year-old in skiing accident should be held to a standard of care appropriate for a minor because he had not yet reached the age of majority).[6]

Additionally, state legislatures have enacted laws establishing minimum ages for a wide range of life's activities, including marriage, driving, purchasing alcoholic beverages, and compulsory school attendance. See *State Age Requirements for Various Activities*, posted on Juvenile Law Center's website at www.jlc.org/agerequirements. (For the Court's reference, a copy of the website listing also is attached at Appendix B.)

Courts also have upheld legislative restrictions on minors' liberty in the form of juvenile curfews. Generally,

---

[6] The operation of motor vehicles, because it has been deemed to be an adult activity, is the one general exception to the "reasonable minor" test.

juvenile curfews have been upheld based upon the findings of this Court that juveniles are not free to come and go at will and, instead, are always in someone's custody. *See note 16 infra.* And as described further in *Part III infra*, enforcement of teen curfews is among the array of police activities that require officers to routinely determine whether an individual is a minor and to take special actions that would be inapplicable to adults in like circumstances.

II. SCHOLARLY RESEARCH SUPPORTS THE NINTH CIRCUIT'S HOLDING THAT MICHAEL'S JUVENILE STATUS MUST BE CONSIDERED IN DETERMINING WHETHER

become part of an adolescent's repertoire; however, this development rarely follows a straight line during adolescence, as periods of progress alternate with periods of regression. Steinberg & Schwartz, *Developmental Psychology* at 24.

Developmental psychologists also recognize that adolescents do not utilize these developing cognitive capacities consistently over time or across a variety of situations. Other non-cognitive, "psychosocial factors," including the external environment, impact adolescent perceptions, judgment and decision-making and limit their capacity for autonomous choice. Elizabeth Cauffman and Laurence Steinberg, *Researching Adolescents' Judgment and Culpability*, in YOUTH ON TRIAL: A DEVELOPMENTAL PERSPECTIVE ON JUVENILE JUSTICE 325, 327-29 (Thomas Grisso & Robert G. Schwartz eds., 2000).[8] As one developmental psychologist has observed, "During the time these processes are developing, it doesn't make sense to ask the average adolescent to think or act like the average adult, because he or she can't – any more than a six-year-old child can learn calculus." Laurence Steinberg, *Juveniles on Trial*, 18 CRIM. JUST. 20, 22 (Fall 2003). These psychosocial factors, described in more detail below, explain why a reasonable juvenile will have a lower threshold for believing that she is in custody as compared to a reasonable adult. Specifically, they confirm why

a reasonable juvenile in Michael's shoes would have concluded that he was not free to leave the interrogation room at the police station.

To begin, adolescents have a different perception of time as compared to adults. Adolescents exhibit present-oriented thinking and have difficulty thinking beyond the present. Generally, they seem unable to think about the future or they discount it. Marty Beyer, *Recognizing the Child in the Delinquent*, 7 KY. CHILD. RTS. J. 16, 17 (Summer 1999) [hereinafter Beyer, *Recognizing the Child*].[9] Another aspect of adolescent thinking is egocentrism, which is an intense self-consciousness that leads teenagers to believe that others are constantly watching and evaluating them. David Elkind, *Egocentrism in Adolescence*, 38 CHILD. DEV. 1025, 1029-30 (1967); KIDS ARE DIFFERENT at 9. Egocentrism interacts with an adolescent's present-oriented thinking to lead an adolescent to only see the difficult circumstances which s/he is currently facing and not see beyond into the future. KIDS ARE DIFFERENT at 9. Consequently, a reasonable youth in Michael's shoes, who was interrogated in the absence of a parent in a police station for 2 ½ hours, would have difficulty seeing past the time that he was confined to the interview room and being questioned by police, to a point in time when he would be free to leave. A reasonable

impact adolescent cognition; in stressful situations, adolescents often will not use the highest level of cognitive reasoning of which they may be capable in non-stressful scenarios. Marty Beyer, *Immaturity, Culpability & Competency in Juveniles: A Study of 17 Cases*, 15 Crim. Just. 27, 27 (Summer 2000).

134 (1980). Thus, a teenager confined to an interrogation room by a police officer who denied both his and his parents' requests that his parents accompany him during the interview would likely view that officer in "polarized terms," i.e., as an authority figure who controls his movements. The teenager would be less likely to consider that the officer may *not* have the authority to hold him or has other motives for questioning that are not adverse to the minor's interests. In this stressful situation and given a lack of experience, a youth is more likely to see only one option – remaining in the interrogation room until he tells the officer the information the officer is seeking – instead of conceiving of other possibilities, i.e., that he can leave without the officer's permission.

Scholarship on moral development in adolescence also explains why a juvenile would be more inclined than an adult to acquiesce to a police officer's demands. Adolescence is marked by "conventional morality" – "conforming to and upholding the rules and expectations and conventions of society or authority just because they are society's rules, expectations, or conventions." Lawrence Kohlberg, THE PSYCHOLOGY OF MORAL DEVELOPMENT: THE NATURE AND VALIDITY OF MORAL STAGES 172-73 (1984). Most people who reach the "postconventional level of morality" – where they grapple with the moral principles underlying these rules before deciding to accept them as their own values – only do so in their twenties. *Id.* at 172-73. The conformity characteristic of adolescence means that teenagers in general are more compliant when confronted by authority figures. Thus, juveniles in Michael's situation are more likely to comply with the officer's demands that he tell a specific story. Adolescence is a time when the gradual transition to becoming a self-governing, autonomous individual begins. KIDS ARE DIFFERENT at 16. But adolescents remain emotionally dependent on other people, specifically their parents and peers, throughout this development process; they are thus less capable of independent, self-directed action than adults who have achieved a greater sense of identity and autonomy.

They are vulnerable to influences from both peers and parents. *Id.* at 16-17.[11]

Finally, new research into the structure and function of the teenage brain also suggests that immature brain development among adolescents may disadvantage them in the interrogation room setting. This research, made possible by new technologies such as magnetic resonance imaging (MRI) that allow scientists to study images of the brain, suggest that the teenage brain does not fully develop until the early 20's. Most importantly, the research suggests that the last areas of the brain to develop are the frontal lobes, specifically the pre-frontal cortex, which govern decision-making, judgment, and impulse control. As this area of the brain develops, young adults become more reflective and deliberate decision makers, the very skills which they would need in confronting and dealing with sophisticated police interrogators. *See* David E. Arredondo, *Child Development, Children's Mental Health and the Juvenile Justice System: Principles for Effective Decision-Making*, 14.1 STAN. L. & POL'Y REV. 13, 15 (2003) (citing NAT'L RES. COUNCIL & INST. OF MED., JUVENILE CRIME, JUVENILE JUSTICE 16 (Joan McCord *et al.* eds., 2001)); Elizabeth S. Scott and Laurence Steinberg, *Blaming Youth*, 81 TEX. L. REV. 799, 816 (2003) (citing Patricia Spear, *The Adolescent Brain and Age-Related Behavioral Manifestations*, 24 NEUROSCIENCE & BIOBEHAVIORAL REVIEWS 417, 421-23 (2000)); National Institute of Mental Health, *Teenage Brain: A Work in Progress* (NIH Publication No. 01-4929, January 2001) (available at http://www.nimh.nih.gov/publicat/teenbrain.pdf). *See also In re Stanford*, 537 U.S. 968, __, 123 S.Ct. 472, 474 (2002) (Stevens, J., dissenting) (noting that "[n]euroscientific evidence of the last

---

[11] *See also* Laurence Steinberg *et al.*, *The Vicissitudes of Autonomy in Early Adolescence*, 57 CHILD DEVELOPMENT 841, 848 (1986); Steinberg & Schwartz, *Developmental Psychology* at 23 (noting that adolescence is a period of "tremendous malleability" and "tremendous plasticity in response to features of the environment.")

few years has revealed that adolescent brains are not fully developed" and "use of magnetic resonance imaging – MRI scans – have provided valuable data that serve to make the case even stronger that adolescents are more vulnerable, more impulsive, and less self-disciplined than adults") (internal quotations omitted) (citations omitted). Although this research is in its infancy, early work does suggest a link between age and decision making, such that a reasonable seventeen-year-old would be less able than a reasonable adult to withstand the pressures of the interrogation setting.[12]

This psychological and neurological research must inform this Court's examination of the specific circumstances of Michael's interrogation. Michael was taken to the police station by his parents after they were contacted by the police. Michael's parents never questioned whether they could decline the detective's request that they bring Michael to the station. The detective denied Michael's and his parents' requests (in Michael's presence) to accompany Michael into the interview room. Michael's parents did not challenge the authority of the police officer to exclude them from the interrogation and instead submitted to the detective's authority. Michael's beliefs about his situation were reasonably shaped by his parents' own submission to police authority. The circumstances surrounding Michael's interrogation, when viewed in the context of the developmental deficits of youth, had a major impact on Michael's reasonable belief that he could not make an autonomous choice, refuse to be interrogated and leave the police station.

---

[12] Another study of the teenage brain suggests that until the frontal lobes mature, teenagers may be less able to process emotions that adults. A.A. Baird, S.A. Gruber et al., *Functional Magnetic Resonance Imaging of Facial Affect Recognition in Children and Adolescents*, 38 J. AMER. ACAD. OF CHILD & ADOLESCENT PSYCHIATRY 195, 195-99 (1999).

III. FEDERAL, STATE AND LOCAL LAWS ALREADY REQUIRE POLICE TO DETERMINE AN INDIVIDUAL'S AGE AND TAKE SPECIFIC ACTIONS UPON LEARNING THAT THE INDIVIDUAL IS UNDER 18; REQUIRING POLICE OFFICERS TO STEP INTO THE SHOES OF A REASONABLE JUVENILE TO ASSESS WHETHER A YOUTH IS IN CUSTODY PLACES NO ADDITIONAL BURDEN ON LAW ENFORCEMENT

Petitioner urges this Court to renounce the reasonable juvenile test for determining custody, arguing, *inter alia*, that the test places an additional burden on law enforcement. This argument is without merit. As described *infra*, pursuant to federal and state laws, and local ordinances, law enforcement officials must routinely determine the age of a suspect and/or a person they are taking into custody and then take certain actions upon learning that the person in question is a minor. Since this determination is already a routine part of law enforcement activities, no additional burden is created by affirming the Ninth Circuit's proper application of the reasonable juvenile test.

Thus, for example, jurisdictions that receive federal monies pursuant to the Juvenile Justice and Delinquency Prevention Act of 1974 (codified as amended at 42 U.S.C. § 5601 *et seq.*)[13] must ensure that law enforcement officers comply with certain requirements with respect to minors in custody.

---

[13] The U.S. Department of Justice reported that in 2001, 48 states, the District of Columbia, and certain territories were either completely or substantially in compliance with this requirement and, thus, were eligible for JJDPA funding in fiscal 2003. *See* Office of Juvenile Justice and Delinquency Prevention, *2001 Compliance Monitoring Summary: Summary of State Compliance with the Juvenile Justice and Delinquency Prevention Act of 1974* (Washington, D.C., December 8, 2003).

Specifically, federal regulations mandate that officers can only keep juveniles in an adult jail or lockup – while maintaining sight and sound separation from adult offenders – for up to six hours from the time they are taken into custody. 28 C.F.R. § 31.303(e) (2) and (3). To comply with this federal mandate, law enforcement officials must routinely determine whether an individual is a minor upon taking that individual into custody. Currently, 48 states, the District of Columbia and certain territories are implementing this mandate. *See n. 12 supra.*

Police officers must make the same initial determination of an individual's "youth status" in those states that require them to promptly notify a minor's parent/ guardian or legal custodian as to the minor's location upon taking the minor into custody.[14]

---

[14] *See, e.g.*, DEL. CODE ANN. tit. 10 § 1004 (officer taking child into custody shall immediately notify); FLA. STAT. ANN. § 985.207(2) (person taking child into custody shall attempt to notify); HAW. REV. STAT. § 571-31 (when juvenile taken into custody, officers must immediately notify); 705 ILL. COMP. STAT. 405/5-405 (when minor arrested, law enforcement "shall immediately make a reasonable attempt" to notify); ME. REV. STAT. ANN. tit. 15 § 3203-A(2) (police officers shall notify "without unnecessary delay" when minor is arrested); MISS. CODE ANN. § 43-21-303(3) (immediately release or continue reasonable efforts to notify); MONT. CODE ANN. § 41-5-331 (when youth taken into custody for questioning, must be immediately notified); N.Y. CRIM. PROC. LAW § 140.20 (officers shall immediately notify when juvenile arrested); N.Y. FAM. CT. LAW § 305.2(3) (same); S.C. CODE § 20-7-7205 (officer taking child into custody shall notify as soon as possible); S.D. CODIFIED LAWS § 26-7A-15 (officer taking child into custody "shall immediately, without unnecessary delay in keeping with the circumstances" notify); TENN. CODE ANN. § 37-1-115 (person taking child into custody shall within a reasonable time either notify or release the child to his parent/guardian or legal custodian); TEX. FAM. CODE ANN. § 52.02 (person taking child into custody shall "promptly" notify); UTAH CODE ANN. § 78-3A-113 (officer taking minor into custody, shall notify "without unnecessary delay"); W.VA. CODE § 49-5-8 (officers must immediately notify when juvenile taken into custody); WIS. STAT. § 938.19(2) (person taking juvenile into custody shall "immediately attempt to notify" and continue to attempt to notify by the most practicable means until either parent/guardian or legal custodian

Similarly, a number of states require law enforcement officials to take certain steps before interrogating a minor. Specifically, these states mandate that a juvenile's parent/guardian, legal custodian or attorney be present during questioning, or at the very least that the minor be given the opportunity to consult with a parent/guardian or attorney before waiving his rights.[15]

---

contacted or juvenile brought to intake worker; when latter, intake worker shall continue attempts until successful notification); WYO. STAT. ANN. § 14-6-206 (any person taking a child into custody shall notify "as soon as possible"). *See also* 18 U.S.C. § 5033 (federal requirement that law enforcement officers who take juvenile into custody immediately notify juvenile's parents, guardian or custodian and "immediately advise such juvenile of his legal rights, in language comprehensive to juvenile").

[15] *See, e.g.*, COLO. REV. STAT. § 19-2-511 (statements by a juvenile resulting from custodial interrogation are inadmissible unless parent/guardian or legal or physical custodian was present at the interrogation and both were advised of the juvenile's rights and both waived the rights in writing; if parent/guardian or custodian not present, statements may be admissible if attorney present); 705 ILL. COMP. STAT. 405/5-170 (minor under 13 must be represented by counsel during entire custodial interrogation); IND. CODE § 31-32-5-1 (rights guaranteed to child can be waived by (1) counsel for child if child knowingly and voluntarily joins the waiver; (2) child's parent/guardian or custodian if that person knowingly and voluntarily waives, has no adverse interest, meaningful consultation has occurred between that person and child, and child knowingly and voluntarily joins in waiver; or (3) emancipated child); IOWA CODE § 232.11 (child less than 16 years of age cannot waive right to be represented by counsel in custodial interrogation the written consent of the child's parent, guardian or custodian; waiver by child 16 years of age and older is only valid if good faith effort made to notify parent/guardian or custodian of child's location, alleged act, and right to visit and confer with child); *In the Matter of B.M.B.*, 955 P.2d 1302, 1312-1313 (Kansas 1998) (juvenile under 14 must be given opportunity to consult with parent/guardian or attorney before waiving rights to an attorney and against self-incrimination; both parent/guardian and juvenile shall be advised of these rights); *Commonwealth v. A Juvenile*, 449 N.E.2d 654, 657 (Mass. 1983) (holding that waiver of Miranda rights by juvenile under 14 is not effective without showing that parent or interest adult was present,

understood the warnings, and had opportunity to explain rights to juvenile; for youth 14 and over, for waiver to be valid without consultation, "the circumstances should demonstrate a high degree of intelligence, experience, knowledge or sophistication on the part of the juvenile"); ME. REV. STAT. ANN. tit. 15 § 3203-A(2-A) (when juvenile is arrested, officer may not question juvenile until either: legal custodian is present during questioning; legal custodian gives consent for questioning in his/her absence; or after reasonable effort, officer cannot contact custodian and officer seeks to question juvenile about continuing or imminent criminal activity); MISS. CODE ANN. § 43-21-303(3) (person taking child into custody shall make continuing reasonable efforts to notify and invite them to be present during questioning), *see also M.A.C. v. Harrison County Family Court*, 566 So.2d 472, 475 (Miss. 1990) (holding that parent has statutory right to be present during interrogation of child); MONT. CODE ANN. § 41-5-331 (youth under 16 years of age may waive rights if youth and youth's parents agree to waiver, or, if youth and parents do not agree, youth made waiver with advice of counsel); *In the Interest of J.F.*, 668 A.2d 426, 430 (N.J. 1995) (holding that police may interrogate a juvenile without a parent/guardian present "only if juvenile has withheld their names and addresses, a good faith effort to locate them is unsuccessful, or they simply refuse to attend the interrogation"); N.Y. FAM. CT. LAW § 305.2(7) (minor under 16 who is in custody for alleged delinquency offense shall not be questioned unless minor and parent or other person legally responsible for minor are advised of minor's rights); N.C. GEN. STAT. § 7B-2101 (when juvenile is under 14, no in-custody statement shall be admitted into evidence unless made in presence of juvenile's parent/guardian or custodian, or juvenile's attorney; if attorney is not present, parent may not waive any rights on behalf of juvenile); OKLA. STAT. tit. 10, § 7303-3.1 (no information gained by a custodial interrogation of a child under sixteen years of age is admissible unless the interrogation is done in the presence of the parents, guardian, attorney, adult relative, adult caretaker, or legal custodian of the child and, if no attorney is present, only after both child and adult have been fully advised of the rights of the child); TEX. FAM. CODE ANN. § 51.09 (child can only waive rights if waiver made in writing by attorney and child); *In re E.T.C.*, 449 A.2d 937, 940 (Vt. 1982) (before juvenile can waive rights, he must be given opportunity to consult with an adult (i.e, parent, legal guardian or attorney) who is completely disassociated from the prosecution and is informed of the juvenile's rights); W.VA. CODE § 49-5-2(k)(1) (statements made by juvenile 14 or 15 years of age while in custody are not admissible unless made in the presence of the juvenile's counsel, or in the presence of

In addition to the requirements set forth in these state and federal laws, the leading police interrogation manual, Fred E. Inbau, John E. Reid *et al.*, CRIMINAL INTERROGATION AND CONFESSIONS (4th ed. 2001) [hereinafter Inbau, Reid], also specifically instructs police on how to deal with youthful suspects and their parents. For example, Inbau, Reid teaches that some states have parental presence requirements, and advises officers specifically on how to deal with "over-protective parents." *Id.* at 300-01. The manual also teaches officers to marginalize parents by advising officers to tell parents to refrain from talking, and to proceed with the interrogation as if the parents were not there. *Id.* at 300-301. Finally, Inbau, Reid counsels law enforcement to use specific psychological "themes" with youthful offenders, such as placing blame for the suspect's actions on their family (if the parent is not present), their neighborhood, or peers, and suggesting that the youth should "embark upon restraint and corrective action before serious consequences develop." *Id.* at 298-300. These recommended specialized tactics for interrogating youthful suspects suggest not only that law enforcement must ascertain the age of the person they are questioning, but that they actually take advantage of the suspect's youth during questioning.

Outside of the station, police officers must routinely inquire whether an individual on the street is a minor in those jurisdictions with juvenile curfews. In the 1990s, "legislatures enacted more than one thousand new juvenile curfew laws and governments revived existing curfew laws that had long been dormant." Deidre E. Norton, *Why Criminalize Children? Looking Beyond the Express Policies Driving Juvenile Curfew Legislation*, 4 N.Y.U. J. LEGIS. & PUB. POL'Y 175, 175 (2000-

---

and with the consent of the juvenile's parent or custodian after the parent/custodian has been fully advised of juvenile's rights; statements made by youth under age 14 are not admissible unless made in the presence of youth's counsel).

2001) (citation omitted). According to a 1995 study of the seventy-seven most populous cities in the United States, 77% of them impose juvenile curfews. Norton at 177 (citing William Ruefle & Kenneth Mike Reynolds, *Curfews and Delinquency in Major American Cities*, 41 CRIME & DELINQ. 347, 353 (1995)). And since 1995, at least nine more of the most populous cities have enacted curfews, bringing the percentage up to 88%. Norton at 177 & n. 10 (citing Ruefle & Reynolds at 353). *See also* U.S. Conference of Mayors, *A Status Report on Youth Curfews in America's Cities: A 347-City Survey* 1 (1997) (www.usmayors.org/uscm/news/publications/curfew.htm) (stating that 70% of the 272 cities surveyed had youth curfews in 1995) [hereinafter Mayors' Conference]. The rationales behind passing youth curfews include reducing delinquent and criminal behavior as well as victimization of youth, and for the daytime curfews, increasing school attendance through enforcement of the jurisdiction's truancy laws. Mayors' Conference at 2-6.[16]

These curfews set specific times of day – both at night and during the day – when minors are not allowed to be on the streets alone. Consequently, police officers on patrol must regularly ascertain whether individuals they encounter on the street during curfew hours are minors. And if police do identify a minor on the street after curfew, officers must then take specific actions that would be inapplicable to an adult, i.e., likely

---

[16] In upholding the constitutionality of juvenile curfews, courts have again relied on this Court's findings that minors' "immaturity, inexperience, and lack of judgment may sometimes impair their ability to exercise their rights wisely," *Qutb v. Strauss*, 11 F.3d 488, 492 (5th Cir. 1993) (quoting *Hodgson v. Minnesota*, 497 U.S. 417, 444 (1990)), and that juveniles lack the fundamental right in free movement. *Hutchins v. District of Columbia*, 188 F.3d 531, 538-39 (D.C. Cir. 1999) (en banc) (citing, *inter alia*, *Vernonia*, 515 U.S. at 654 and *Schall*, 467 U.S. at 265) and *Schleifer v. City of Charlottesville*, 159 F.3d 843, 847 (4th Cir. 1998) (citing, *inter alia*, *Vernonia*, 515 U.S. at 654).

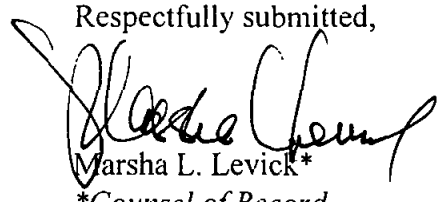
issue some type of citation, and either take the minor home, back to school, or to the police station if they cannot locate a responsible adult. *See, e.g., Hutchins v. District of Columbia*, 188 F.3d 531, 534-35 (D.C. Cir. 1999) (en banc) (describing curfew law and procedures in Washington, D.C.); *Schleifer v. City of Charlottesville*, 159 F.3d 843, 856-58 (4th Cir. 1998) (same for Charlottesville, Virginia); *Qutb v. Strauss*, 11 F.3d 488, 496- 499 (5th Cir. 1993) (same for Dallas, Texas).

Given the myriad of federal, state and local laws, as well as police training literature, that already require or encourage police to determine the age of individuals they come into contact with, it can hardly be deemed an additional burden for law enforcement to ascertain a person's age when interviewing or interrogating them. This argument is especially specious with regard to minors interrogated at police stations, where law enforcement is under *federal mandate* to know whether the individual is a juvenile.

CONCLUSION

For the foregoing reasons, *Amici Curiae* Juvenile Law Center *et al.*, respectfully request that the judgment of the U.S. Court of Appeals for the Ninth Circuit be affirmed.

Respectfully submitted,



Marsha L. Levick*

APPENDIX A

IDENTITY OF *AMICI CURIAE*

Organizations

Juvenile Law Center (JLC) is one of the oldest legal service firms for children in the United States, founded in 1975 to advance the rights and well being of children in jeopardy. JLC pays particular attention to the needs of children who come within the purview of public agencies – for example, abused or neglected children placed in foster homes, delinquent youth sent to residential treatment facilities or adult prisons, or children in placement with specialized services needs. JLC works to ensure children are treated fairly by systems that are supposed to help them, and that children receive the treatment and services that these systems are supposed to provide. We believe the juvenile justice and child welfare systems should be used only when necessary, and work to ensure that the children and families served by those systems receive adequate education, and physical and mental health care. JLC is a non-profit public interest firm. Legal services are provided at no cost to our clients.

The **Northwestern University School of Law's Bluhm Legal Clinic** has represented poor children in juvenile and criminal proceedings since the Clinic's founding in 1969. The **Children and Family Justice Center** (CFJC) was established in 1992 at the Clinic as a legal service provider for children, youth and families and a research and policy center. Six clinical staff attorneys currently work at the CFJC, providing legal representation and advocacy for children in a wide variety of matters, including in the areas of juvenile delinquency, criminal justice, special education, school suspension and expulsion, immigration and political asylum, and appeals. CFJC staff attorneys are also law school faculty members who supervise

second- and third-year law students in the legal and advocacy work; they are assisted in this work by the CFJC's social worker and social work students.

Founded in 1997, the **Juvenile Justice Project of Louisiana** (JJPL) has established itself as a partner in efforts to reform Louisiana's juvenile justice system. We have dedicated ourselves to advocating not only for more effective, less expensive alternatives to incarceration, but also for the zealous and effective representation of children in the juvenile and criminal justice systems. JJPL was founded on the recognition that children and adolescents are fundamentally different from adults and, as such, require developmentally appropriate interventions and advocacy. The manner in which the judicial system responds to young people in crisis has been a central focus of JJPL. We believe that children must be afforded essential due process protections and that such protections necessarily include a consideration of their developmental capacities and limitations. This is particularly the case where a child is likely to feel intimidated by authority figures. Given the ways in which young people are especially susceptible to police questioning and interrogations, a juvenile must have meaningful access to counsel to ensure his rights are protected. JJPL is committed to ensuring that children and youth accused of wrongdoing receive the appropriate protections of the law.

Legal Services for Children (LSC) was founded in 1975 as the first non-profit law firm established to provide free direct legal and social services to children and youth. LSC represents youth in dependency, guardianship, school expulsion, immigration and other cases. LSC uses attorney-social worker teams to assist at-risk youth in the Bay Area who need to access the legal system to stabilize or improve their lives. LSC's mission is to empower youth by increasing their active participation in making decisions about their own lives. LSC works directly with youth involved in, or at risk of involvement

in the juvenile justice system. LSC is also the host organization for the Pacific Juvenile Defender Center. The Defender Center provides support, training and technical assistance for juvenile defenders throughout California and Hawaii. It is the mission of the Defender Center to improve the quality of juvenile defense in our region and ensure that juveniles are provided with holistic representation that meets their needs.

The **Mexican American Legal Defense and Educational Fund** (MALDEF) is a national civil rights organization established in 1968. Its principal objective is to secure, through litigation, advocacy, and education, the civil rights of Latinos and Latinas living in the United States. During the last several years, MALDEF's work in the area of criminal justice has been expanding. Within our criminal justice work, a goal of our organization is to protect the constitutional rights of Latino and Latina youth who come into contact with the criminal and juvenile justice systems.

The **National Council of La Raza** (NCLR) is a private, nonprofit, nonpartisan organization established in 1968 to reduce poverty and discrimination and improve life opportunities for Hispanic Americans. NCLR works toward this goal through two primary, complementary approaches: capacity-building assistance to support and strengthen Hispanic community-based organizations and applied research, policy analysis, and advocacy. Over the past four years, NCLR has focused its civil rights policy portfolio to include juvenile and criminal justice issues affecting the Latino community. NCLR joins this brief to support the Constitutional rights of Latino youth who come into contact with the criminal and juvenile justice systems, as well as with state and federal law enforcement officials.

The **Public Defender Service for the District of Columbia** (PDS) represents numerous juvenile clients in the District of Columbia who will be affected by this case. In our experience, child clients are much more likely than adults to view themselves in custody and to give false confessions in order to please or influence adult authority figures. We have observed that, because our juvenile clients are continuously "in the custody" of an adult authority, be it a parent, guardian, or other legal custodian, they lack the freedom and autonomy of most adults and tend to assume that they "must" speak in situations where a reasonable adult client would not. In fact, in many situations in which the "reasonable" adult is free to walk away, it would be "unreasonable" for children to have the same expectation and sense of freedom. We believe it is important for the Court to have the benefit of our real world observations as it considers the important issues presented by this case, especially because we believe that the unique circumstances of the custodial interrogation of children result in wrongful convictions of juvenile clients.

The **San Francisco Public Defender's Office** provides legal representation per year to approximately 1,400 juveniles, aged 10 -18 who are arrested and charged with delinquent offenses. The majority of the juvenile clients represented by the office come from difficult family circumstances and live in dangerous and poverty stricken neighborhoods and are in need of legal and social services. Our juvenile clients are a very vulnerable population with needs that are substantial and involve multi-systems collaborations such as with special education, mental health, dependency and immigration. The goal of the juvenile justice system is very different from the adult system. We recognize the need to treat children going through adolescence very differently than adults. We, therefore, support the *amicus* brief on behalf of the respondent in this case.

The **Southern Center for Human Rights** is a non-profit, public interest legal program governed by a Board of Directors. Among its missions are protection of the constitutional rights of children and adults accused of crimes, achieving equal justice, and ensuring that the criminal justice system operates consistently with the requirements of the Bill of Rights. The Center is particularly interested in law enforcement practices as they relate to children and others who may not have the same maturity and judgment as others in dealing with law enforcement officers.

The **Youth Law Center** (YLC) is a national public interest law firm with offices in San Francisco and Washington, D.C., that has worked since 1978 on behalf of children in juvenile justice and child welfare systems. YLC has worked with judges, prosecutors, defense counsel, probation departments, corrections officials, sheriffs, police, legislators, community groups, parents, attorneys, and other child advocates in California and throughout the country, providing public education, training, technical assistance, legislative and administrative advocacy, and litigation to protect children from violation of their civil and constitutional rights. YLC has worked for more than two decades to promote individualized treatment and rehabilitative goals in the juvenile justice system, protection of due process rights of youth at risk, effective programs and services for youth at risk and in trouble, consideration of the developmental differences between children and adults, and racial fairness in the justice system. YLC is particularly interested in adolescent development issues, having worked on such issues for 25 years, including helping to develop a comprehensive training curriculum on adolescent development for juvenile court personnel with the support of the John D. and Catherine T. MacArthur Foundation.

Individuals

Professor Marie Banich received her Ph.D. from the University of Chicago in 1985. She is a professor in the Department of Psychology at the University of Colorado at Boulder and in the Department of Psychiatry, at the University of Colorado Health Sciences Center, in Denver. Her fields of professional interest are cognitive neuroscience and human neuropsychology. She is currently examining decision-making processes of adolescents and adults.

Professor Jeffrey Fagan is a Professor of Law and Public Health at Columbia University. He is also a member of the MacArthur Foundation Research Network on Adolescent Development and Juvenile Justice. Professor Fagan is currently conducting research on several dimensions of juvenile law and juvenile justice, including the competence and culpability of adolescents facing transfer to the criminal court. He is also conducting research on the death penalty for persons who commit capital offenses before their 18th birthday; this research suggests that the developmental limitations of adolescents may compromise their capacity for full participation in legal proceedings when punishment is at stake, whether in criminal or juvenile court. Professor Fagan has conducted research on capital punishment, and his research has shown that false confessions are often a cause of wrongful conviction and reversible error. Accordingly, he agrees to sign this *amicus* brief to assist in defining standards and procedures for assessing the competence of adolescents facing legal proceedings and the possibility of punishment.

Professor Barry Feld is a Centennial Professor of Law at the University of Minnesota Law School. He has done extensive research on many aspects of juvenile justice and has taught about the field for three decades. His publications have included eight books and more than 60 articles on juvenile

justice procedure and administration. Professor Feld has written extensively about adolescent development and juveniles' competence and capacity to waive their legal rights, both to waive their Miranda rights and their right to counsel.

Professor Martin Guggenheim of the New York University School of Law (NYU) is among the nation's pre-eminent scholars, teachers and practitioners in the area of children's law. At NYU, he is Executive Director of Washington Square Legal Services (NYU's free legal services program), and Supervising Attorney of NYU's Family Defense Clinic, which seeks to protect vulnerable families from unwarranted governmental intrusion. He directed NYU's Juvenile Rights Clinic for fifteen years, and currently teaches a seminar entitled Child, Parent & State that explores such issues as the rights of young people and the bases for according young people rights that adults have under the Constitution. As a *pro bono* advocate for children, Professor Guggenheim has litigated innumerable cases in the state and federal courts, and served as chief counsel for the following three cases in the United States Supreme Court: *Schall v. Martin*, 467 U.S. 253 (1984), *Lehman v. Lycoming County Children's Services Agency*, 458 U.S. 502 (1982), and *Santosky v. Kramer*, 455 U.S. 745 (1982). Professor Guggenheim serves on numerous national and regional boards of directors and advisors for organizations and projects involving children.

Professor Randy Hertz of the New York University School of Law (NYU) is also among the country's leading scholars and teachers in the area of children and the law. He is the Director of Clinical Programs at NYU, as well as Supervising Attorney of NYU's Juvenile Rights Clinic, and the Editor-In-Chief of the Clinical Law Review, a national, peer-reviewed scholarly journal. Professor Hertz is a current or former member of numerous professional organizations

aimed at improving the administration of justice for children. He has published many books and articles on subjects including the legal needs of young people. He is the 2000 recipient of the American Bar Association's Livingston Hall Award for Juvenile Justice Advocacy.

Professor Paul Holland, a clinical assistant Professor of Law at the University of Michigan Law School, has represented youth charged with crimes for over ten years, in Washington, D.C., Illinois, and Michigan. He served as Deputy Director of the Juvenile Justice Clinic at Georgetown University Law Center for five years. He also served as a member of the Illinois Sub-Cabinet for Children and Families. He is presently the Michigan representative to the Board of the Midwest Region Juvenile Defender Center.

The Honorable David B. Mitchell is retired from the Circuit Court for Baltimore City, having served 18 years as a judge of this court of general jurisdiction. His duties, in addition to those generally associated with a judge at that level of court, included being the presiding and administrative judge of the juvenile and later the criminal divisions of that court. He also was chairman for many years of the Juvenile and Family Law Committee of the Maryland Judicial Conference. He adheres to the *amicus* brief in his individual capacity as a retired judge.

Professor Wallace Mlyniec is the Associate Dean of Clinical Education and Public Service Programs, Lupo-Ricci Professor of Clinical Legal Studies, and Director of the Juvenile Justice Clinic at Georgetown University Law Center. He teaches courses in family law and children's rights and assists with the training of criminal defense and juvenile defense fellows in the Prettyman Legal Internship Program. He is the author of numerous books and articles concerning criminal law and the law relating to children and families.

Wallace Mlyniec received a Bicentennial Fellowship from the Swedish government of study their child welfare system, the Stuart Stiller Award for public service, and the William Pincus award for contributions to clinical education. He holds his B.S. from Northwestern University and his J.D. from Georgetown University.

Professor Edward P. Mulvey is a Professor of Psychiatry and Director of the Law and Psychiatry Program at Western Psychiatric Institute and Clinic at the University of Pittsburgh School of Medicine. He received his B.A. in psychology from Yale University in 1973, and his Ph.D. in Community/Clinical Psychology from the University of Virginia in 1982. Dr. Mulvey is a Fellow of both the American Psychological Association and the American Psychological Society, a recipient of a Faculty Scholar's Award from the William T. Grant Foundation, a member of two MacArthur Foundation Research Networks (one on Mental Health and the Law and another on Adolescent Development and Juvenile Justice), and a member of the
